***Allowable Subject Matter***

1. This office action is in response to the amendment filed on 11/08/04.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims in accordance to the office action dated 09/07/04. Upon further consideration and comparison with prior art of record (closest reference, Jeong – US 6,515,712), claims 1-14 are allowed. Distortion compensation in an amplifier using pre-distortion, which is controlled via feedback from the output of the amplifier, is not new in the art. Prior art of record, taking individually or collectively, fails to a particular method and apparatus for compensating distortion, as claimed, including “integrating means for integrating the level of the distortion component detected by the distortion component detecting means in every level of the input signal detected by the input signal level detecting means, and control value updating means for updating the control value corresponding to the level used by the distortion control means so that the integration result of every level of the input signal obtained from the integrating means may be small” in independent claim 1 and “counting means for counting inputs at specified level of the level of input signal detected by the input signal level detecting means, integrating means for integrating the level of the distortion component detected by the distortion component detecting means when the level of the input signal detected by the input signal level detecting means is the specified level for : the period until a specified value is counted by the counting means, and control value updating means for updating the control value corresponding to the specified level used by the distortion

control means so that the integration result of the integrating means may be small" in independent claim 2, and similarly in other independent claims 5, 6, 9, 10 (claims 3, 4, 7, 8, 11-14 depend therefrom). Thus, claims 1-14 are found to be novel and unobvious over prior art of record.
